Mode
tile collection

The Nicholls & Clarke Group is a business dedicated to the manufacture and supply of the finest building materials. Founded in 1875 in London, we have grown from servicing the capitals' building trades to becoming the largest privately owned national manufacturer and distributor of fine quality building products.

Quality manufacturing is at the core of our business and comes as standard. We own state of the art manufacturing facilities based across the UK and Central Europe. This gives us the broadest manufacturing capability available, allowing us to offer an extensive portfolio of product, more specialised than that of any of our competitors.

Our distribution network is supported with our private fleet of over 110 commercial vehicles. This gives us full logistical control from the point of manufacture through to delivery to site. We offer a nationwide delivery service, either to site, home or commercial address. The vast majority of our deliveries are made on a next day basis.

Developing the Mode Tile Collection

Differentiate from the crowd through our vast collection of attractive designs that suit domestic and commercial projects. Excite your imagination with our extensive collection of the latest, on-trend ceramic, porcelain and mosaic tiles, designed with inspiration in mind.

As one of the leading tile suppliers in the UK, we offer quality, inspirational tile designs in a variety of colours, textures, finishes and size formats. We offer the latest in design through innovative use of inkjet technology and manufacturing processes, whilst still meeting the most stringent budget requirements. With our nationwide distribution centres, £10,000,000 stock availability and next day delivery* we offer an unrivalled service and product availability to our clients.

With a wide range of design formats and finishes we can guarantee you the best in quality and style for the value of your money.

Experience

Established in 1875, the Nicholls & Clarke Group has pedigree that has been developed over many years. Through great heritage, we have gained a depth of knowledge and invaluable experience in the supply and distribution of N&C products to the construction market. We have experience across many industries with a huge portfolio of products suited to all project environments.

Total Solution Providers

As part of the Nicholls & Clarke Group, we have the ability to offer the complete tiling package through a comprehensive range of quality products. You can benefit from dealing with one source, making it easier to co-ordinate project supplies. Furthermore, with nationwide distribution depots, we hold over £10,000,000 worth of stock for immediate collections or next day delivery (subject to delivery schedule).

Inventors & Innovators

N&C Nicobond invented ready mixed tile adhesive in 1958 and continue to be at the forefront of innovation. Embracing new technologies within the industry and better defining our portfolio with products that perform, where quality and functionality are at its peak. As inventors, we continue to engage in research and development. Our factories use the latest in inkjet technology and manufacturing processes for the optimum in quality and design.

International

N&C Nicobond products are used in over 70 countries throughout the world in some of the most demanding commercial situations and climates imaginable. This worldwide experience has furthered the development of some of the latest technologies we now use in the U.K.

24 Hour Nationwide Delivery

Nicholls & Clarke are unique in being able to offer nationwide, next day delivery (subject to delivery schedule), even when you order up to 5pm the day before and there is no minimum order requirement. N&C Nicobond operates from 16 branches nationwide, so can offer localised delivery. With thousands of product lines in stock, you also have the option to collect.

Environment

As an ISO14001 company, sustainability is a core part of our company agenda. As well as various carbon offsetting programmes in place, we invest a great deal in manufacturing and developing solutions dedicated to reducing our carbon footprint, and in turn increasing our customers' green credentials.

British Manufacture

Our three state of the art U.K manufacturing facilities comply with ISO9001 and ISO14001. They utilise the latest manufacturing technologies and apply stringent quality control checks during every part of the manufacturing process. Only the highest quality raw materials, product formulations and packaging materials are used, ensuring the finished product meets our exacting standards, far exceeding those of the latest European standards.

Training

We offer practical training courses at our 120,000 square foot head office facility. Our team of experts will demonstrate and give clients and customers the opportunity to get hands on with our range of products. For further information please contact our Head Office on 020 8586 4600 or email us at info@nichollsandclarke.com

Customer Care

We aim to provide you with an outstanding level of customer service that will help to further enhance the service you offer to your clients. We monitor our performance levels and strive to achieve 100% client satisfaction. We believe that open channels of communication with our customers, coupled with their feedback are a sure way of further improving our customers buying experience.

Technical Service

The N&C Nicobond Technical Team has well over 100 years of combined experience in the tile industry. We are able to offer a full technical specification service and are available to attend any site address throughout the U.K. A technical written specification is available on request.

Research & Development

The chemists in our highly equipped laboratories are constantly engaged in research and development. Investment in the latest laboratory equipment and testing facilities allow us to push forward with the development of the next new technology or raw material that will further enhance product performance or handling characteristics. Prior to going to market, we undergo rigorous testing of all our products to ensure that performance is to a high standard. All products are tested to meet the relevant standards and regulations.

Trade Associations & Technical Committees

N&C Nicobond has been heavily involved in the creation of British & European Standards for decades. We have chaired The Tile Association (TTA) and their Wetroom Technical Committee. We continue to push for stringent policing of the industry which would stop manufacturers falsely claiming specific European standards on packaging. Our philosophy has always been to drive up quality and standards whilst remaining highly competitive.

Digital Imaging

Digital image definition and the flexibility of the process means that each tile can be different if required, allowing more realistic representation of natural material such as stone. It also allows design flexibility to produce murals or unique floors. Different patterns of tile can be processed in sequence or even together. High image definition can be achieved.

Traditionally, ceramic tile decoration was a costly practice which involved a fair amount of dust and residual materials. Inkjet printing processes have significantly reduced costs allowing manufacturers to dispense with screens, screen rollers, silicone rollers and devices to engrave, coupled with a substantial reduction in pigment use and associated pastes. We will highlight products that use this inkjet technology throughout.

Ceramic

With a glazed finish on the front and a clay "biscuit" backing, ceramic tiles are available in many colours and sizes, in a variety of finishes such as gloss, satin or matt. The high porosity biscuit allows the use of ready-mixed adhesives. Being easier to cut and install than porcelain or natural stone often makes ceramics a more cost-effective option. The use of inkjet printing technology in some ranges adds a natural appearance. Some ceramic tiles can be used on the floor. Due to the manufacturing and firing process, ceramic tiles may vary in tone or size between batches and therefore it is important to ensure that all boxes are marked with the same batch number and tiles from a number of boxes are mixed during fixing. Please ask in branch for details.

Porcelain

The higher firing temperature of porcelain tiles ensures that they are fully vitrified, producing tiles with enhanced properties which are harder wearing, with increased load ratings and the manufacturing process of unglazed or through bodied porcelain means that if the tile suffers an impact chip, the original colour remains. As with ceramic tiles, the manufacturing and firing process may produce a variance in tone or size between batches and therefore it is important to ensure that all boxes are marked with the same batch number and tiles from a number of boxes are mixed during fixing. Please ask in branch for details.

Testing

We have the ability to do PTV tests (Pendulum Test Values) as well as LRV tests (Light Reflectance Values) which is the subject of a British Standard, BS 7976. Research has confirmed these tests to be reliable and accurate, therefore Nicholls and Clarke have adopted this as a standard test method.

Natural Stone

Our travertine, marble, slate and limestone ranges are natural products quarried from around the world. These tiles are produced from naturally occurring stone and therefore the colour and patterning may vary quite considerably between tiles – this is a feature of this kind of product. All natural stones require specific treatment while fixing, including initial cleaning, impregnator sealing and on-going maintenance. It is important all relevant instructions are followed.

Mosaics

The majority of our mosaic tiles are attached to a mesh backing for ease of installation. The mesh can be cut to size with scissors to provide a cost-effective border or décor strip with any main tile.

Agglomerate Quartz

In a typical manufacturing process, graded marble or quartz is compressed and blended together with a resin producing an amazing finish. Large blocks are produced which are cut to size and given the required surface finish. Specific fixing instructions must be followed. Please ask in branch for advice and further details.

Colour Shade Variation Grading

The variation of colour, texture, and tone between individual ceramic tiles is referred to as 'colour shade variation'. Variation in colour and shade is an inherent characteristic of any fired product and can actually enhance the character and beauty of the project. Shade variation is inherent in all tile products, including man-made tiles. Shade texture will vary from piece to piece within production runs. V1 shade variation has little or no change from piece to piece, whereas a V4 will have a large variety of colour and/or texture changes. Prior to any installation, the tiles should be approved by the customer as shades of colour are seen differently on computer screens and brochures. Therefore, we advise that customers request a sample before making a final selection or purchase.

V1

V1-Uniform Appearance:

Minimal to no difference among pieces from the same production run because each ceramic tile is manufactured using the same glaze applications and body texture.

V2

V2-Slight Variation:

Distinguishable differences in texture and/or pattern within similar colours.

V3

V3-Moderate Variation:

Though the colours present in a single piece of ceramic tile may indicate the colours to be expected on other tiles, the amount of colours on each piece may vary significantly.

V4

V4-Substantial variation:

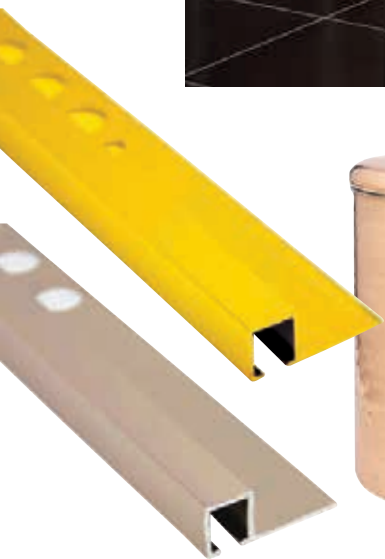

Random colour variation from tile to tile, so that one ceramic tile may have a totally different colour from that on other tiles. Thus, the final installation will be unique.

Make your project a style icon by using the latest interior design trends...

Hot Metal

Create a warm welcome within the home with the latest Hot Metal look. Incorporate the latest fashion trends for those who entertain at home by using Gold and Rose Gold décor. Use this style to warm up a cold area.

Shabby Chic

Shabby Chic, a look that you can make your own. Whether you decide to create an industrial edge or add some colour to give it a boho affect, you can be sure to create a homely feel within your project.

Marble

Natural materials are an investment which never go out of style. Marble can be used throughout a whole room or just to add a touch to complement an area. Incorporate a long lasting trend within your project with this look.

Scandinavian

Be inspired by Scandinavian style when decorating a home. Clean lines and natural materials create a minimalistic but effective look within any kind of project.

Get the look...

The Synergy Series makes it easy for the designer, housebuilder or home owner to use a mix of materials, colours and elements throughout their project with the confidence that each room can have a change of colour, trend and style, but where all components will work beautifully together in harmony with colours and tones that complement each other perfectly.

The range combines porcelain, ceramic, mosaic, glass, woods, paints, grouts, sealants, shower trays and furniture in co-ordinating hues and tones, available in different sizes and textures in order to create an enhanced effect greater than that of their individual appeal.

Creating endless design possibilities inside and out...

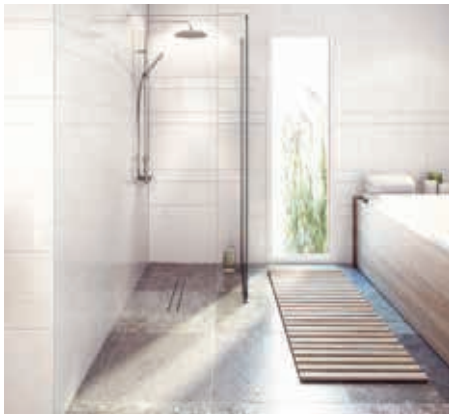

Synergy

Total Solution *provider*

WET ROOMS

As manufacturers of the complete system, N&C offer every component required to create a stylish, level access showering environment.

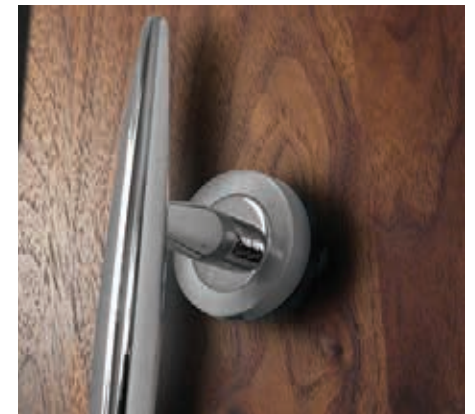

ADHESIVES

We manufacture innovative, high performance adhesives, grouts and tiling systems through our Nicobond brand, within our UK based factory.

GLASS & GLAZING

As the UK's leading independent supplier of commercial and domestic glass and glazing products, we can offer unrivalled solutions at competitive prices.

IRONMONGERY

As Ironmongers since 1875, and as part of the Guild of Architectural Ironmongers, we specialise in everything required in washrooms

FLOORING

As leading manufacturers, we provide quality materials for required safety flooring, such as Altro, vinyl tiles and screeds.

BATHS

From contemporary to classic, we have a broad collection of baths in a range of shapes and styles perfect for hotels.

INDEPENDENT LIVING

Through our Phlexicare brand, N&C are leading manufacturers and distributors of independent living solutions designed for people with all levels of abilities, covering accessible showering, multi user kitchens and more.

DECORATING

Our builders merchant division offers all the popular trade brands for decorators and building professionals.

Before fixing please ensure that the tiles purchased are of the same batch as no responsibility can be accepted after the tiles have been fixed. We recommend that all ceramics should be fixed using N&C Nicobond adhesives, grouts and accessories. N&C Nicobond recommend that all ceramic tiles are installed according to the N&C Nicobond 'Tiling Solutions' guide and in accordance with BS5385.

The colours shown within this catalogue are as accurate as the limitations of the printing process will allow. The images of tiles shown in this catalogue are representative of the product but are not necessarily to scale.

Print cannot reproduce a true likeness of colour, tone or texture. Reference to a sample is essential.

Contact your local branch or Sales Representative for dedicated literature. Alternatively, visit www.nichollsandclarke.com/downloads.
