Creating beautiful spaces through Synergy

The Synergy Series makes it easy for the designer, housebuilder or home owner to use a mix of materials, colours and elements such as ceramics, porcelain, woods and glass throughout their project with the confidence that each room can have a change of colour, trend and style, but where all components will work beautifully together in harmony with colours and tones that complement each other perfectly.

We have developed the award winning Synergy series to include further on-trend materials, shapes, tones and elements to create the perfect interior throughout the home or commercial space.

The range combines porcelain, ceramic, mosaic, glass, woods, paints, grouts, sealants, shower trays and furniture in co-ordinating hues and tones, available in different sizes and textures in order to create an enhanced effect greater than that of their individual appeal.

Experience

Established in 1875, the Nicholls & Clarke Group has pedigree that has been developed over many years. Through great heritage, we have gained a depth of knowledge and invaluable experience in the supply and distribution of N&C products to the construction market. We have experience across many industries with a huge portfolio of products suited to all project environments.

Total Solution Providers

As part of the Nicholls & Clarke Group, we have the ability to offer the complete tiling package through a comprehensive range of quality products. You can benefit from dealing with one source, making it easier to co-ordinate project supplies. Furthermore, with nationwide distribution depots, we hold over £10,000,000 worth of stock for immediate collections or next day delivery (subject to delivery schedule).

Inventors & Innovators

N&C invented ready mixed tile adhesive in 1958 and continue to be at the forefront of innovation. Embracing new technologies within the industry and better defining our portfolio with products that perform, where quality and functionality are at its peak. As inventors, we continue to engage in research and development. Our factories use the latest in inkjet technology and manfacturing processes for the optimum in quality and design.

International

N&C products are used in over 70 countries throughout the world in some of the most demanding commercial situations and climates imaginable. This worldwide experience has furthered the development of some of the latest technologies we now use in the U.K.

24 Hour Nationwide Delivery

N&C are unique in being able to offer nationwide, next day delivery (subject to delivery schedule), even when you order up to 5pm the day before and there is no minimum order requirement. N&C Nicobond operates from 17 branches nationwide, so can offer localised delivery. With thousands of product lines in stock, you also have the option to collect.

Training

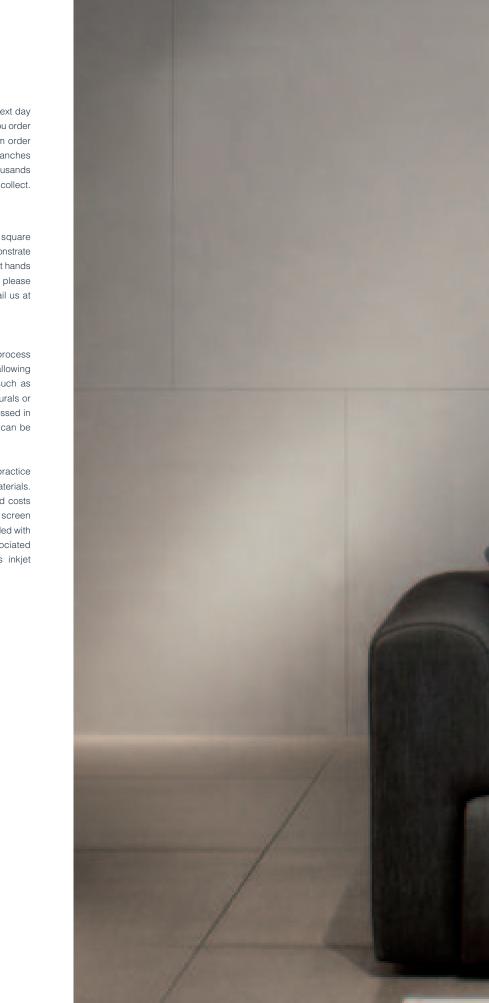

We offer practical training courses at our 120,000 square foot head office facility. Our team of experts will demonstrate and give clients and customers the opportunity to get hands on with our range of products. For further information please contact our Head Office on 020 8586 4600 or email us at info@nichollsandclarke.com

Quality Production

Digital image definition and the flexibility of the process means that each tile can be different if required, allowing more realistic representation of natural material such as stone. It also allows design flexibility to produce murals or unique floors. Different patterns of tile can be processed in sequence or even together. High image definition can be achieved.

Traditionally, ceramic tile decoration was a costly practice which involved a fair amount of dust and residual materials. Inkjet printing processes have significantly reduced costs allowing manufacturers to dispense with screens, screen rollers, silicone rollers and devices to engrave, coupled with a substantial reduction in pigment use and associated pastes. We will highlight products that use this inkjet technology throughout.

The Synergy Tones

With colours you can set a mood, attract attention, or make a statement. You can use colour to invigorate or create a sense of serenity. By selecting the right colour scheme, you can achieve the desired outcome for your project. Colour can be your most powerful design element if you use it effectively.

The colour palette offered within the Synergy Series is divided into warm and cool colors. This approach enables you to categorise the tones within the palette in order to achieve your desired scheme.

Warm colours are inviting and trigger a sense of comfort, whereas cool colours can give an impression of serenity, contemporary living or elegance. 'Greige' is a term used to define a colour that uses a balance of grey with a warm undertone to combine elements of both. Bold accent colours added to the Synergy theme helps to create personality individuality in the design.

THE COLOUR TEMPERATURE SCALE

ANALOGOUS COLOUR SCHEME

Synergy uses a fairly simple colour concept. We use an analogous colour scheme, whereby the colours are next to each other in the colour spectrum rather than contrasting.

TONES, TINTS AND SHADES

The Synergy Series uses different tones, tints and shades. If a colour is made lighter by adding white, the result is called a tint. If black is added, the darker version is called a shade. If grey is added, the result is a different tone. They complement each other very well and create serene and comfortable designs. These colour schemes are often found in nature and are harmonious and pleasing to the eye.

Creating your colour scheme:

Choose one color to dominate, a second to support. The third colour is used as an accent. Here we use a Jasmine colour as the main colour, Cappuccino to support and Black frames as the accent.

0

E

Creating endless design possibilities inside and out...

Increase the perceived size of your home or commercial space by seamlessly extending it outdoors onto a balcony or patio area. Within our collection, those ranges with an 'OUT' finish achieve a pedulum test value (PTV) of >36 which means they are suitable for outdoor use where slip is a concern.

View our Landscape, Progress ans Surface ranges for options that can be used outside on a balcony, patio area or garden.

Get the Look...

The Synergy Series allows you to gain greater confidence with colour. Achieve a harmonious creation with tones that complement each other perfectly.

Inspire Structure is perfect for creating a feature wall or focal point in a room

Use Synergy products with warm 'coffee like' tones in a mix of textures and materials such as porcelain, ceramic, mosaic, paints, grout and decor for a neutral, fresh space.

Inspire - Warm White Structure

A gorgeous large format tile that increases the perceived size of the room.

M2 - Vintage Stone

Two gorgeous, neutral colours in luxurious vinyl matt or eggshell finishes for the perfect base to build your room interiors from.

Synergy Starlike Grout

If grouting random patterned tiles, píck the colour domínantly featured as your grout colour. We recommend Shark Grey or even Travertíne for this range.

Black

Get the look...

Merge Hexagons highlight the epitome of on-trend design with hexagon shaped tiles offered in our multi tone Synergy palette of colours.

The traditional pattern design with a 'lived in' look achieves a revived effect. Merge cleverly fuses vintage chic with contemporary appeal to offer a range that is dynamic and can be used to fulfill individual design aspirations and tastes. Use with cement effect tiles to achieve contemporary chic with a classic twist.

Merge Hexagons Cool Multi Mix Decor

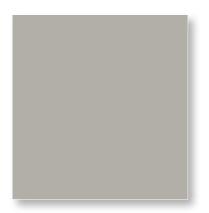

Create a carpet area effect or use on larger areas to create the perfect statement design.

Cemento Dark Grey

Get the look...

Create the ultimate contemporary space using cool elements from the Synergy Series. Utilise coordinating furniture and shower panels for the complete look in a bathroom environment.

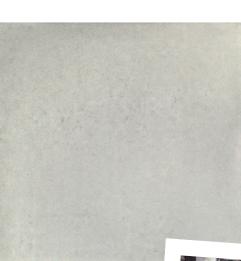

Flexible Grout Plus Opt for Black, Shark Grey or White Grout to achieve the look

For the perfect finishing touches, complement your design with our unique formulation of Synergy Starlike Grout, Starlike Grout Plus with added sparkle, Nicobond Silicone Sealant, Nicobond Vinyl Matt Emulsion and Acrylic Eggshell. Our specially formulated tiling solutions have been created with high performance qualities to provide a high quality, luxurious finish.

Matt Emulsion/Acrylic Eggshell

Silver Black Matt Emulsion Acrylic Eggshell NB2570004 NB2570014

Vinyl Matt Emulsion 2.5kg

Synergy Vinyl Matt Emulsion offers the ultimate matt finish for contemporary, and sophisticated aesthetics. The perfect solution for absorbing light for non reflective surfaces. A water-based quick-drying matt emulsion that provides a durable and washable decorative finish for interior walls and ceilings. Coverage up to 17m² per litre dependant on surface texture and porosity.

Acrylic Eggshell 1ltr

Synergy Acrylic Eggshell has been specially formulated to harmoniously complement all the elements within the Synergy series. The subtle satin like finish creates an instant opulance and a luxurious effect to your interiors. A water-based quickdrying low odour eggshell providing a moisture resistant soft sheen finish for interior walls and ceilings that is very durable and washable. Ideal for kitchens and bathrooms where steam is a consideration. Coverage up to 12m² per litre dependant on a smooth non porous surface.
