

N&C

Wet Room
collection

The Nicholls & Clarke Group of Companies is a business dedicated to the manufacture and supply of the finest building materials. Founded in 1875 in London, we have grown from servicing the capitals' building trades to becoming the largest privately owned national manufacturer and distributor of fine quality tiles, bathrooms and related products.

Quality manufacturing is at the core of our business. We own state of the art manufacturing facilities based across the UK and Central Europe. This gives us the broadest manufacturing capability available, allowing us to offer an extensive portfolio of product more specialised than that of any of our competitors.

Our fifteen distribution centres are strategically placed to provide full coverage within all areas of the United Kingdom. This distribution network is further supported with our private fleet of over 100 commercial vehicles. This gives us full logistical control from the point of manufacture through to delivery to site. We offer a Nationwide delivery service be that to site, home or commercial address. The vast majority of our deliveries are made on a next day basis.

Create a Wet Room Haven

In today's modern bathroom, a wet room is fast becoming the epitome of style for those seeking a relaxing environment with the freedom of movement, open living and minimalist design.

A wet room is an open showering area that seamlessly blends into the rest of the bathroom, creating a level access floor with no obstructions or steps, with all drainage set into the floor. The result is the creation of a beautiful, uncluttered floor that is easy to maintain and instantly increases the value of properties.

Create The Perfect Wet Room

Tiles

Select your tiles & shower fittings from the N&C range.

Shower Screens

N&C shower screens offer an attractive and contemporary look to your Wet Room.

Wet Room Tanking System

Use Nicobond Wet Room Waterproofing Membrane, Tanking Sheet & other components to create a fully waterproofed Wet Room environment.

Drainage

A choice of Phleximax or Phlexiline living drainage with a stylish selection of stainless steel covers.

Shower Base

The Premier Shower Deck is a totally waterproof and robust floor former which can be laid directly onto suspended joists or inlaid into a screed.

Total Wet Room Solutions Providers

At Nicholls & Clarke, we are unique in being able to combine our manufacturing facilities to be able to offer you a 'Total Wet Room Solution'. Using our experience, we have created a complete wet room system which ensures peace of mind, because each component is designed to work in harmony with each other to create a cost effective, easy to install solution which is watertight, practical and easy to maintain.

Simply select the wet room style of your preference then follow the simple steps to create the ultimate in bathroom design.

Finesse Two

Endure sophistication with Finesse Two, a frameless option that enhances any showering space by enabling freedom of movement, unhindered by traditional enclosure frames.

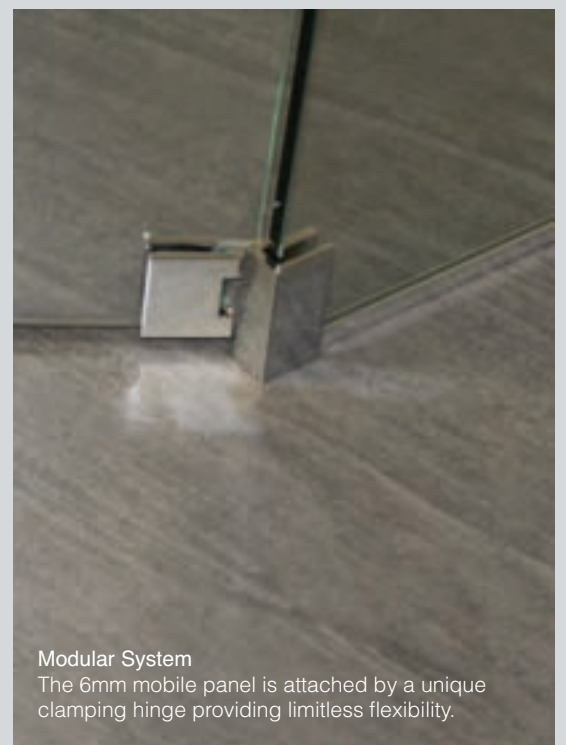

As one of the most versatile in the collection, Finesse Two allows you to create the perfect showering option for any environment by simply selecting the style of your choice. Install onto a shower tray or directly onto the wet room floor.

Speed of Installation
The 8mm glass panel is secured with a flexible seal.

Premier Shower Deck

The N&C Premier Shower Deck is the perfect solution for creating a level access floor for a seamless transition from the bathroom floor to the shower area. As a leading floor former in the market, the Premier Shower Deck takes the hassle out of wet room installations. It is completely self-supporting, easy to cut, install and can be tiled directly onto.

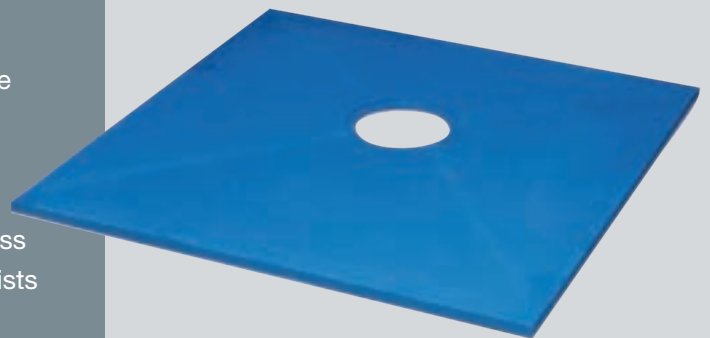

The Premier Shower Deck can easily be installed onto concrete by removing the screed, or onto timber floors, by removing the floorboards and fixing directly onto the joists.

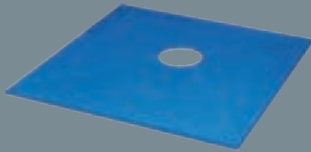

22mm Profile

Features and Benefits:

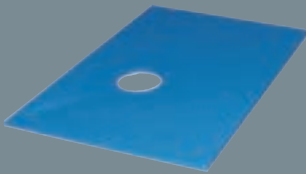

- Strong and durable base
- 22mm profile
- Can be tiled or vinyled
- Built-in gradients
- Ideal for total level access
- Waste offset to avoid joists
- Self supporting
- 470kg load capacity
- Made of 50% recycled plastic
