

N&C

Inspire
tile collection

A little about us.

Established in 1875, the Nicholls & Clarke Group has pedigree that has been developed over many years. Experience has allowed us gain a depth of knowledge and invaluable experience in the supply and distribution of N&C products in the markets we operate in.

Over the years, we have acquired a great deal of expertise working with house builders, housing associations, local authorities, architects, specifiers, commercial projects and many other industries with a huge portfolio of products suited to the environment.

Marblehex Calacatta Gold
Cover image: Marblehex Calacatta White

On-Trend Designs

Engaging in colour and trend forecasting enables us to anticipate sought after looks and colour palletes. Understanding key market shifts within the different sectors is vital to the success of our client portfolio as it enables you to forecast client preferences and deliver inspired designs that reflect knowledge and creativity.

Thorough independent research and development, has been undertaken to understand design direction, trends and preferences, which today makes up our tile collection.

Digital Imaging

The use of the latest in ink jet technology allows for the highest dpi (dots per inch) that open up a world of flexibility in tile design, whereby reproductions can be made of intricately detailed materials such as natural stones, wood effects, concrete and more.

Refined Quality

Our breadth of experience within the tile industry enables us to offer the best in terms of quality, digital imaging and through bodied porcelains to offer durable surfaces designed to last.

Our factories use the latest in inkjet technology to intricately replicate natural materials such as stone, timber, marble to name a few.

Product Availability

As part of the Nicholls & Clarke Group, we have the ability to offer the complete tiling package through a comprehensive range of quality products. You can benefit from dealing with one source, making it easier to co-ordinate project supplies. Furthermore, with nationwide distribution depots, we hold over £10,000,000 worth of stock for exceptional product availability.

Colour Shade Variation Grading

The variation of colour, texture, and tone between individual ceramic tiles is referred to as 'colour shade variation'. Variation in colour and shade is an inherent characteristic of any fired product and can actually enhance the character and beauty of the project. Shade variation is inherent in all tile products, including man-made tiles. Shade texture will vary from piece to piece within production runs and are therefore given a variation (V) rating.

Uniform Appearance:

Minimal to no difference among pieces from the same production run

Slight Variation:

Distinguishable differences in texture and/or pattern within similar colours.

Moderate Variation:

The amount of colours on each piece may vary significantly.

Substantial variation:

Random colour variation from tile to tile.

Surface

Surface is our most dynamic range that allows you to extend your existing spaces from room to the outdoors for a seamless space. The range consists of 'IN' for internal rooms made from rectified porcelain and 'OUT', made from unrectified porcelain that achieves an impressive Pendulum Test Value (PTV) of >36. Surface is practical, reliable and elevates the look of any space.
