tile collection

The Nicholls & Clarke Group is a business dedicated to the manufacture and supply of the finest building materials. Founded in 1875 in London, we have grown from servicing the capitals' building trades to becoming the largest privately owned national manufacturer and distributor of fine quality building products.

Quality manufacturing is at the core of our business and comes as standard. We own state of the art manufacturing facilities based across the UK and Central Europe. This gives us the broadest manufacturing capability available, allowing us to offer an extensive portfolio of product, more specialised than that of any of our competitors.

Our distribution network is supported with our private fleet of over 110 commercial vehicles. This gives us full logistical control from the point of manufacture through to delivery to site. We offer a nationwide delivery service, be that to site, home or commercial address. The vast majority of our deliveries are made on a next day basis.

Creating Inspiring Interiors Through Mode

Differentiate from the crowd through our vast collection of attractive designs that suit domestic and commercial projects. Excite your imagination with our extensive collection of the latest, on-trend ceramic, porcelain and mosaic tiles, designed with inspiration in mind.

As one of the leading tile suppliers in the UK, we offer quality, inspirational tile designs in a variety of colours, textures, finishes and size formats. We offer the latest in design through innovative use of inkjet technology and manufacturing processes, whilst still meeting the most stringent budget requirements. With our nationwide distribution centres, £10,000,000 stock availability and next day delivery* we offer an unrivalled service and product availability to our clients.

With a wide range of design formats and finishes we can guarantee you the best in quality and style whilst remaining competitive.

Our Customers

As a multi-faceted company with a reputation and pedigree built over 140 years, we have gained a depth of knowledge and invaluable experience in the supply and distribution of N&C products. We have experience across many industries with a huge portfolio of products suited to all project environments. We work with and supply to the design industry, housebuilders, contractors, retailers and end users.

Research & Development

The product and design teams are constantly engaged in research and development to ensure that the new collections meet future trends, market requirements, as well as new innovations that make us unique suppliers. Investment in the latest laboratory equipment and testing facilities allow us to push forward with the development of the next new technology or raw material that will further enhance product performance or characteristics. Prior to going to market, we undergo rigorous testing of all our products to ensure that performance is to a high standard. All products are tested to meet the relevant standards and regulations.

High Definition Imaging

Our factories use the latest in inkjet technology with high precision processes to closely replicate the natural beauty of woods, stones and other effects on ceramics and porcelains. The result is an outstanding replication of the real material.

Total Solution Providers

As part of the Nicholls & Clarke Group, we have the ability to offer the complete package through a comprehensive range of quality products. You can benefit from dealing with one source, making it easier to co-ordinate project supplies. Furthermore, with nationwide distribution depots, we hold over £10,000,000 worth of stock for immediate collection or delivery.

Inventors & Innovators

We embrace new technologies within the industry which help to better define our portfolio, with products that perform, where quality and functionality are at its peak. As inventors, we continue to engage in research and development. Our factories use the latest in inkjet technology and manufacturing processes for the optimum in quality and design.

Nationwide Delivery

We are unique in being able to offer nationwide delivery with no minimum order requirement. N&C operates from 17 branches nationwide, so can offer localised delivery. With thousands of product lines in stock, you also have the option to collect.

British Manufacture

Our three state of the art U.K manufacturing facilities comply with ISO9001 and ISO14001. They utilise the latest manufacturing technologies and apply stringent quality control checks during every part of the manufacturing process. Only the highest quality raw materials, product formulations and packaging materials are used, ensuring the finished product meets our exacting standards, far exceeding those of the latest European standards.

Customer Care

We aim to provide you with an outstanding level of customer service that will help to further enhance the service you offer to your clients. We monitor our performance levels and strive to achieve 100% client satisfaction. We believe that open channels of communication with our customers, coupled with their feedback are a sure way of further improving our customers buying experience.

Technical Service

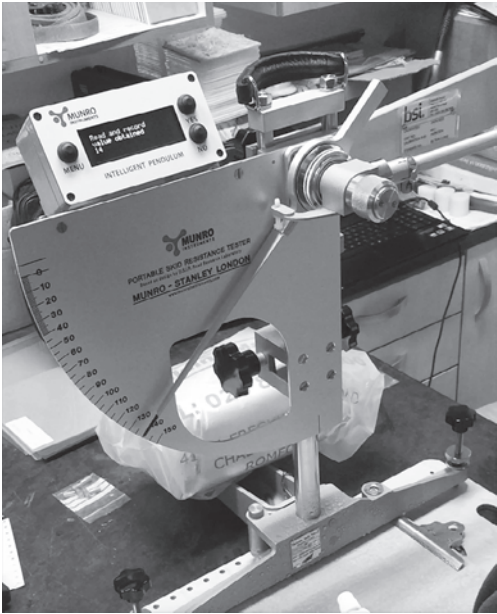

Our Technical Team has well over 200 years of combined experience in the tile industry. We are able to offer a full technical specification service and are available to attend any site address throughout the U.K. A technical written specification is available on request.

Trade Associations & Technical Committees

N&C are heavily involved in the creation of British & European Standards for decades. We have chaired The Tile Association (TTA) and their Wet room Technical Committee. We continue to push for stringent policing of the industry which would stop manufacturers falsely claiming specific European standards on packaging. Our philosophy has always been to drive up quality and standards whilst remaining highly competitive.

Testing

We have the ability to do PTV tests (Pendulum Test Values) as well as LRV tests (Light Reflectance Values) which is the subject of a British Standard, BS 7976. Research has confirmed these tests to be reliable and accurate, therefore Nicholls and Clarke have adopted this as a standard test method.

Ceramic

With a glazed finish on the front and a clay “biscuit” backing, ceramic tiles are available in many colours and sizes, in a variety of finishes such as gloss, satin or matt. The high porosity biscuit allows the use of ready-mixed adhesives. Being easier to cut and install than porcelain or natural stone often makes ceramics a more cost-effective option. The use of inkjet printing technology in some ranges adds a natural appearance. Some ceramic tiles can be used on the floor. Due to the manufacturing and firing process, ceramic tiles may vary in tone or size between batches and therefore it is important to ensure that all boxes are marked with the same batch number and tiles from a number of boxes are mixed during fixing. Please ask in branch for details.

Porcelain

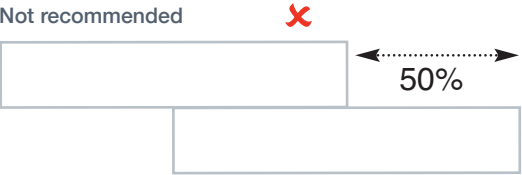

The higher firing temperature of porcelain tiles ensures that they are fully vitrified, producing tiles with enhanced properties which are harder wearing, with increased load ratings and the manufacturing process of unglazed or through bodied porcelain means that if the tile suffers an impact chip, the original colour remains. As with ceramic tiles, the manufacturing and firing process may produce a variance in tone or size between batches and therefore it is important to ensure that all boxes are marked with the same batch number and tiles from a number of boxes are mixed during fixing. Please ask in branch for details.

Natural Stone

Travertine, marble, slate and limestone ranges are natural products quarried from around the world. These tiles are produced from naturally occurring stone and therefore the colour and patterning may vary quite considerably between tiles – this is a feature of this kind of product. All natural stones require specific treatment while fixing, including initial cleaning, impregnator sealing and on-going maintenance. It is important all relevant instructions are followed.

Rectangular Effect Laying Advice

We recommend the installation of rectangular effect planks to be positioned with a maximum 30% over lap.

Mosaics

The majority of our mosaic tiles are attached to a mesh backing for ease of installation. The mesh can be cut to size with scissors to provide a cost-effective border or décor strip with any main tile.

Quartz

In a typical manufacturing process, graded marble or quartz is compressed and blended together with a resin producing an amazing finish. Large blocks are produced which are cut to size and given the required surface finish. Specific fixing instructions must be followed with this material. See our N&C Gulfstone™ collection.

Colour Shade Variation Grading

The variation of colour, texture, and tone between individual ceramic tiles is referred to as 'colour shade variation'. Variation in colour and shade is an inherent characteristic of any fired product and can actually enhance the character and beauty of the project. Shade variation is inherent in all tile products, including man-made tiles. Shade texture will vary from piece to piece within production runs. V1 shade variation has little or no change from piece to piece, whereas a V4 will have a large variety of colour and/or texture changes. Prior to any installation, the tiles should be approved by the customer as shades of colour are seen differently on computer screens and brochures. Therefore, we advise that customers request a sample before making a final selection or purchase.

V1-Uniform Appearance:
Minimal to no difference among pieces from the same production run because each ceramic tile is manufactured using the same glaze applications and body texture.

V2-Slight Variation:
Distinguishable differences in texture and/or pattern within similar colours.

V3-Moderate Variation:
Though the colours present in a single piece of ceramic tile may indicate the colours to be expected on other tiles, the amount of colours on each piece may vary significantly.

V4-Substantial variation:
Random colour variation from tile to tile, so that one ceramic tile may have a totally different colour from that on other tiles. Thus, the final installation will be unique.

Forecasting Future Trends

Colour can be your most powerful design element if you use it effectively. At N&C we engage in colour forecasting and anticipate future colour trends relevant to our industry. Our colour palette has been influenced by bringing together the insight and knowledge of leading colour specialists.

We anticipate future tile trends through our team and partners to bring you the latest in designs, colours, technologies, shapes, formats and finishes.

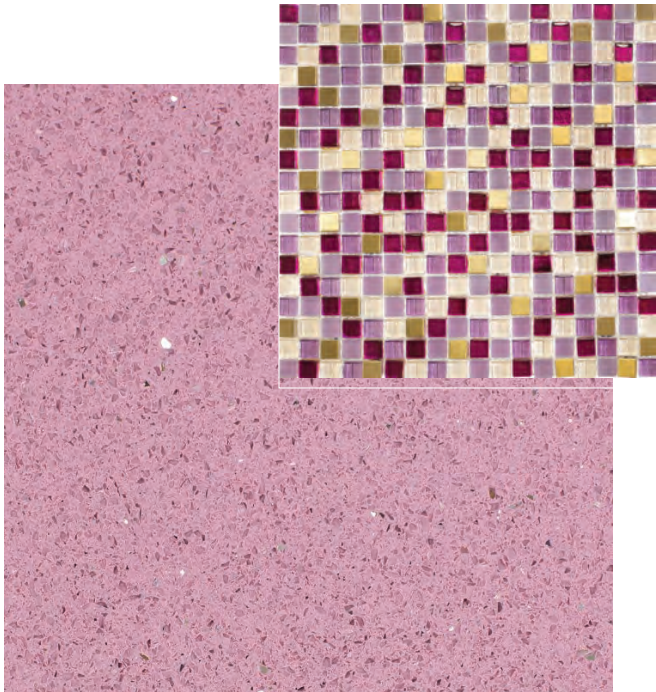

Skintones

Blush, clay and peach hues resonating cosmetic neutrals combine with variations of white to form this soft and feminine palette. Today, as a society we partake in artificial approaches to conceal, contour and blend in an imperfect world to create the idealistic illusion of self and our interiors. An ideal alternative approach to neutrals.

Artisan

This trend brings together the love of pattern, tradition and authenticity whilst being intrigued by products inspired by Moroccan culture. Designs often feel domesticated and give a sense of comfort. Bold colours inject energy into interiors, whilst delicate structures add fluid femininity to this trend.

Woods

The unrepeating nature and beauty of wood continues to develop as a key trend for domestic and commercial interiors. The trend has evolved where the natural intentions of wood are manipulated with artificial processes to produce a unique statement design.

Outdoor Living

As we gain inspiration and invite the beauty of nature into our home, this trend reverses this ideal and expands our home spaces into the outdoors. As the importance of relationships continue to grow, our outdoor spaces become places for social enjoyment. Indoor tiles seamlessly transition into the outdoor counterpart for an indefinite expansion of space.

Marble

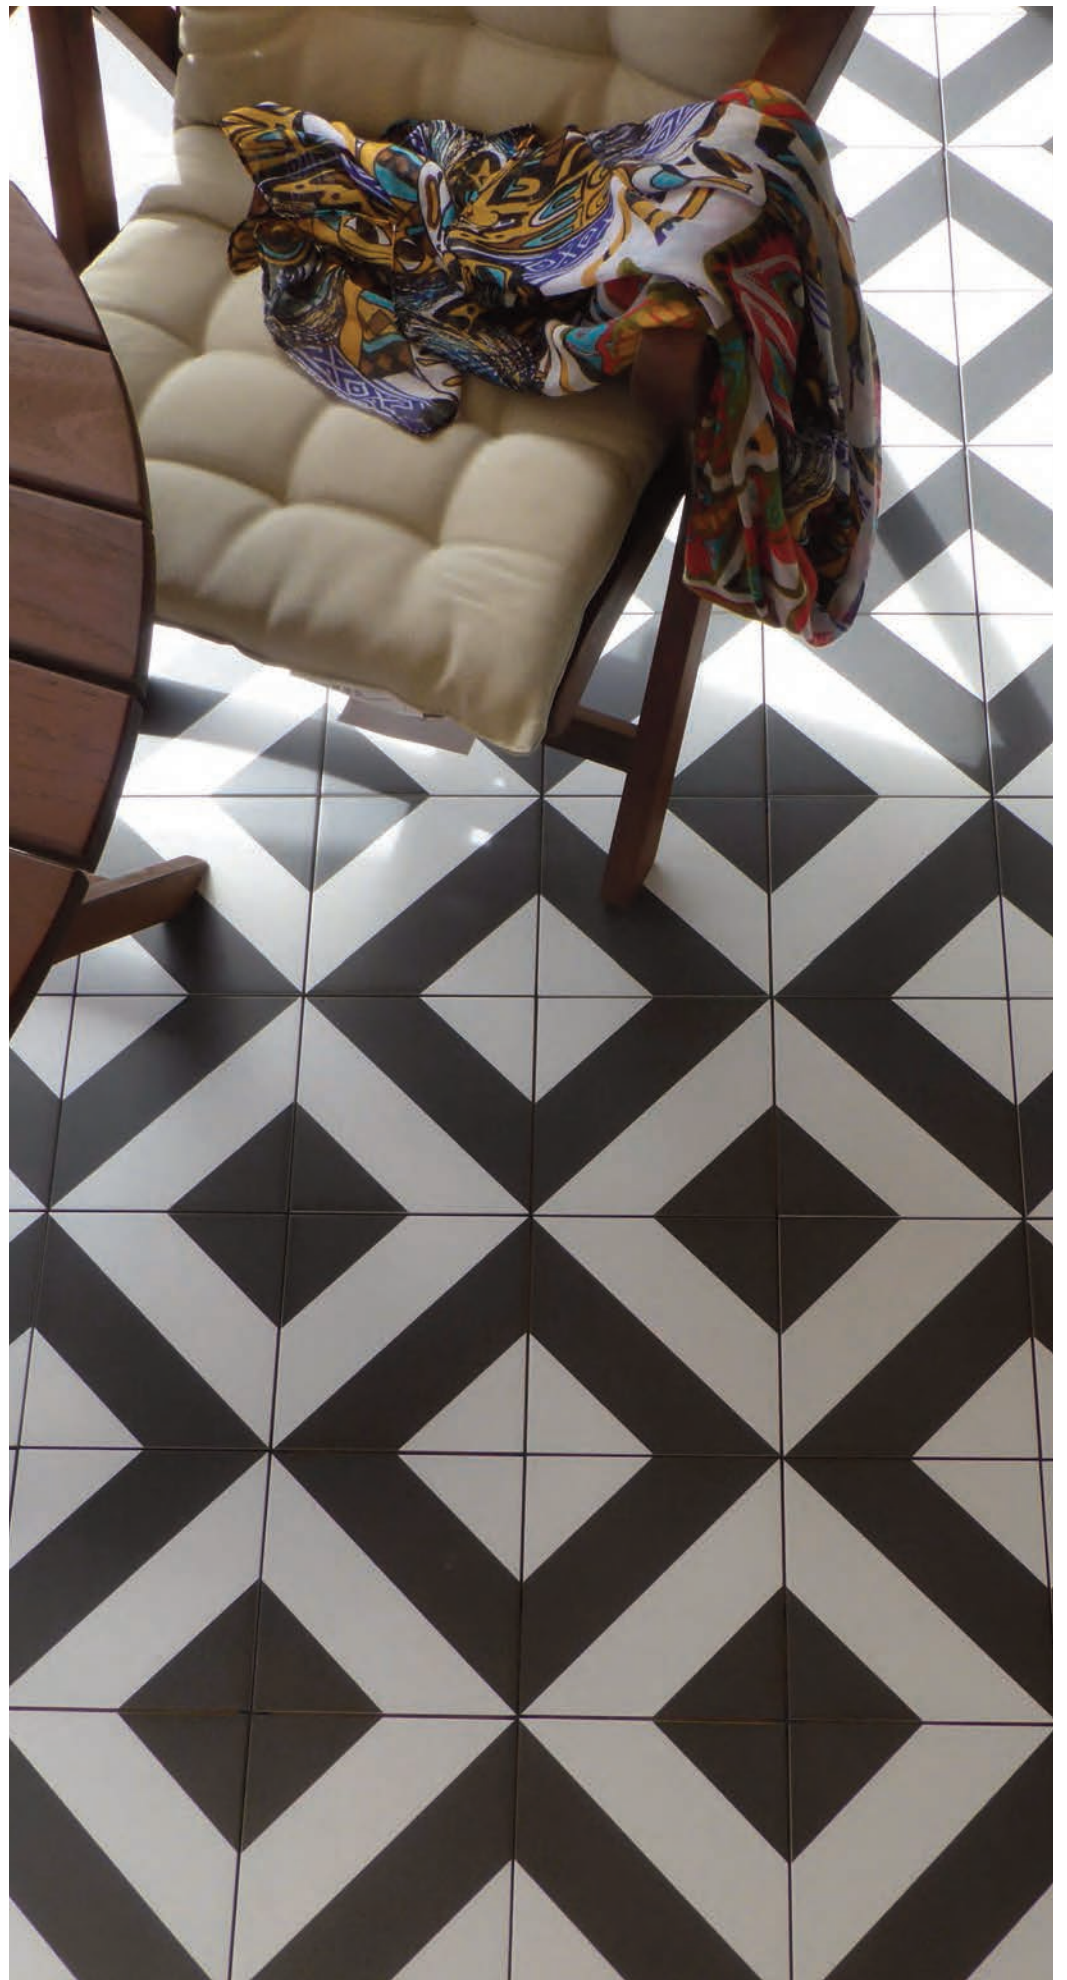

Marble effects continue to grow as it proves its timeless appeal with an evolution of carrara, with more warmer tones and veining. A reinvention of the trend see darker colours with contrasting details taking precedence with a greater uptake of different formats including slabs for an inherent, opulent look we all love.

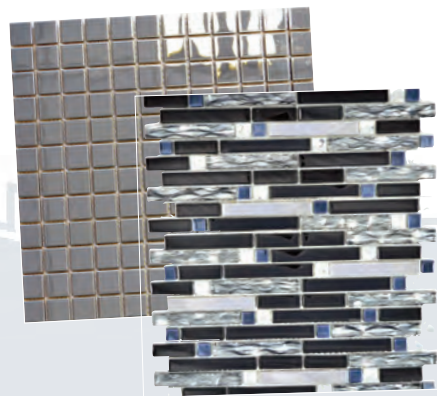

Geometrics

A man-made approach to this trend, geometric patterns are a collection of shapes, repeating or altered to create a cohesive design inspired by geometric modelling. The psychology behind shapes allows for designers to control the mood of an environment. Squares signify balance and tradition, whilst triangles represent energy and a contemporary nature.

Noir Chic

The love for darker tones have been making their way back into the interior palette. This trend is a take on modern mono's, with a restrained colour palette that provides greater opportunity for decor with black profiling, black matt taps and lots of greenery. A truly sophisticated trend inspired by a 1920's set up.

Country-Cottage

A trend that celebrates the imperfections of aged materials such as stone, handmade tiles, multi sizes and variations. The advancements in tile production technology has enabled superb attention to detailing for the production of authentic designs that offer a country-cottage or farmhouse feel.

Natural Japanese Wood

Floor: Natural Japanese Wood Sapphire Blue

Natural Japanese Wood

Natural Japanese Wood is an addition to our extensive range of ceramic and porcelain wood effect tiles. Reminiscent of the Japanese technique of 'shou sugi ban' where wood is burnt then oiled in the aim of preserving wood planks. Digital inkjet technology creates a realistic wood effect tile but with the durability and strength of porcelain.

Tuscan Flagstones - Cotto

Our Flagstone Cotto tiles are designed with a blend of cement and stone in warm, natural tones. Perfect for creating an authentic appearance often found in historical sites and ruins. The hand made effect with imperfect edges and varying modular sizes gives this impressive tile its sense of authenticity and an aged appearance.

N&C Gulfstone™

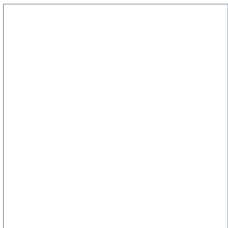

N&C Gulfstone™

Gulfstone Quartz is a distinctive, high quality tile collection recognised as the best quartz worldwide, designed with mirror chips that beautifully capture the light for a dazzling effect. Gulfstone Quartz works perfectly in commercial or domestic environments. Produced using industry leading technology the product can be defined as a high-density material as it is made of granules of high-grade quartz/silica (93%) blended with engineered polyester resin, an organic compound as a binding agent.

Notes

Total Solution *provider*

WET ROOMS

As manufacturers of the complete system, N&C offer every component required to create a stylish, level access showering environment.

ADHESIVES

We manufacture innovative, high performance adhesives, grouts and tiling systems through our Nicobond brand, within our UK based factory.

GLASS & GLAZING

As the UK's leading independent supplier of commercial and domestic glass and glazing products, we can offer unrivalled solutions at competitive prices.

IRONMONGERY

As Ironmongers since 1875, and as part of the Guild of Architectural Ironmongers, we specialise in everything required in washrooms

FLOORING

As leading manufacturers, we provide quality materials for required safety flooring, such as altro, vinyl tiles and screeds.

BATHROOMS

From contemporary to classic, we have a broad collection of bathroom products.

INDEPENDENT LIVING

Through our Phlexicare brand, N&C are leading manufacturers and distributors of independent living solutions designed for people with all levels of abilities, covering accessible showering, multi user kitchens and more.

DECORATING

Our builders merchant division offers all the popular trade brands for decorators and building professionals.

Before fixing please ensure that the tiles purchased are of the same batch as no responsibility can be accepted after the tiles have been fixed.

We recommend that all ceramics should be fixed using N&C Nicobond adhesives, grouts and accessories. N&C Nicobond recommend that all ceramic tiles are installed according to the N&C Nicobond 'Tiling Solutions' guide and in accordance with BS5385.

The colours shown within this catalogue are as accurate as the limitations of the printing process will allow.
The images of tiles shown in this catalogue are representative of the product but are not necessarily to scale.

Print cannot reproduce a true likeness of colour, tone or texture. Reference to a sample is essential.

Contact your local branch or Sales Representative for dedicated literature. Alternatively, visit www.nichollsandclarke.com/downloads.
